

PROJECT NO: 4405 (Termination Report)

TITLE: A Braconid Egg/Larval Parasitoid of the Codling Moth

PERSONNEL: John J. Brown
Department of Entomology
Washington State University
Pullman, WA 99164-6382

REPORTING PERIOD: November, 1990 through November, 1996

Accomplishments: This project contributed to the proposal and subsequent SARE grant that brought in over \$270,000 for tree fruit research in the Pacific Northwest.

Significant contributions from this research project can be found in the following publications. All these publications acknowledge the generous support of the Tree Fruit Research Commission over the past years.
